

Raymarine®

SOFTWARE

RayTechRNS 6.0

Advanced PC Navigation Software Suite

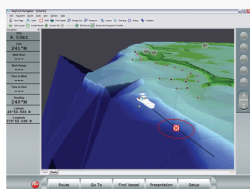

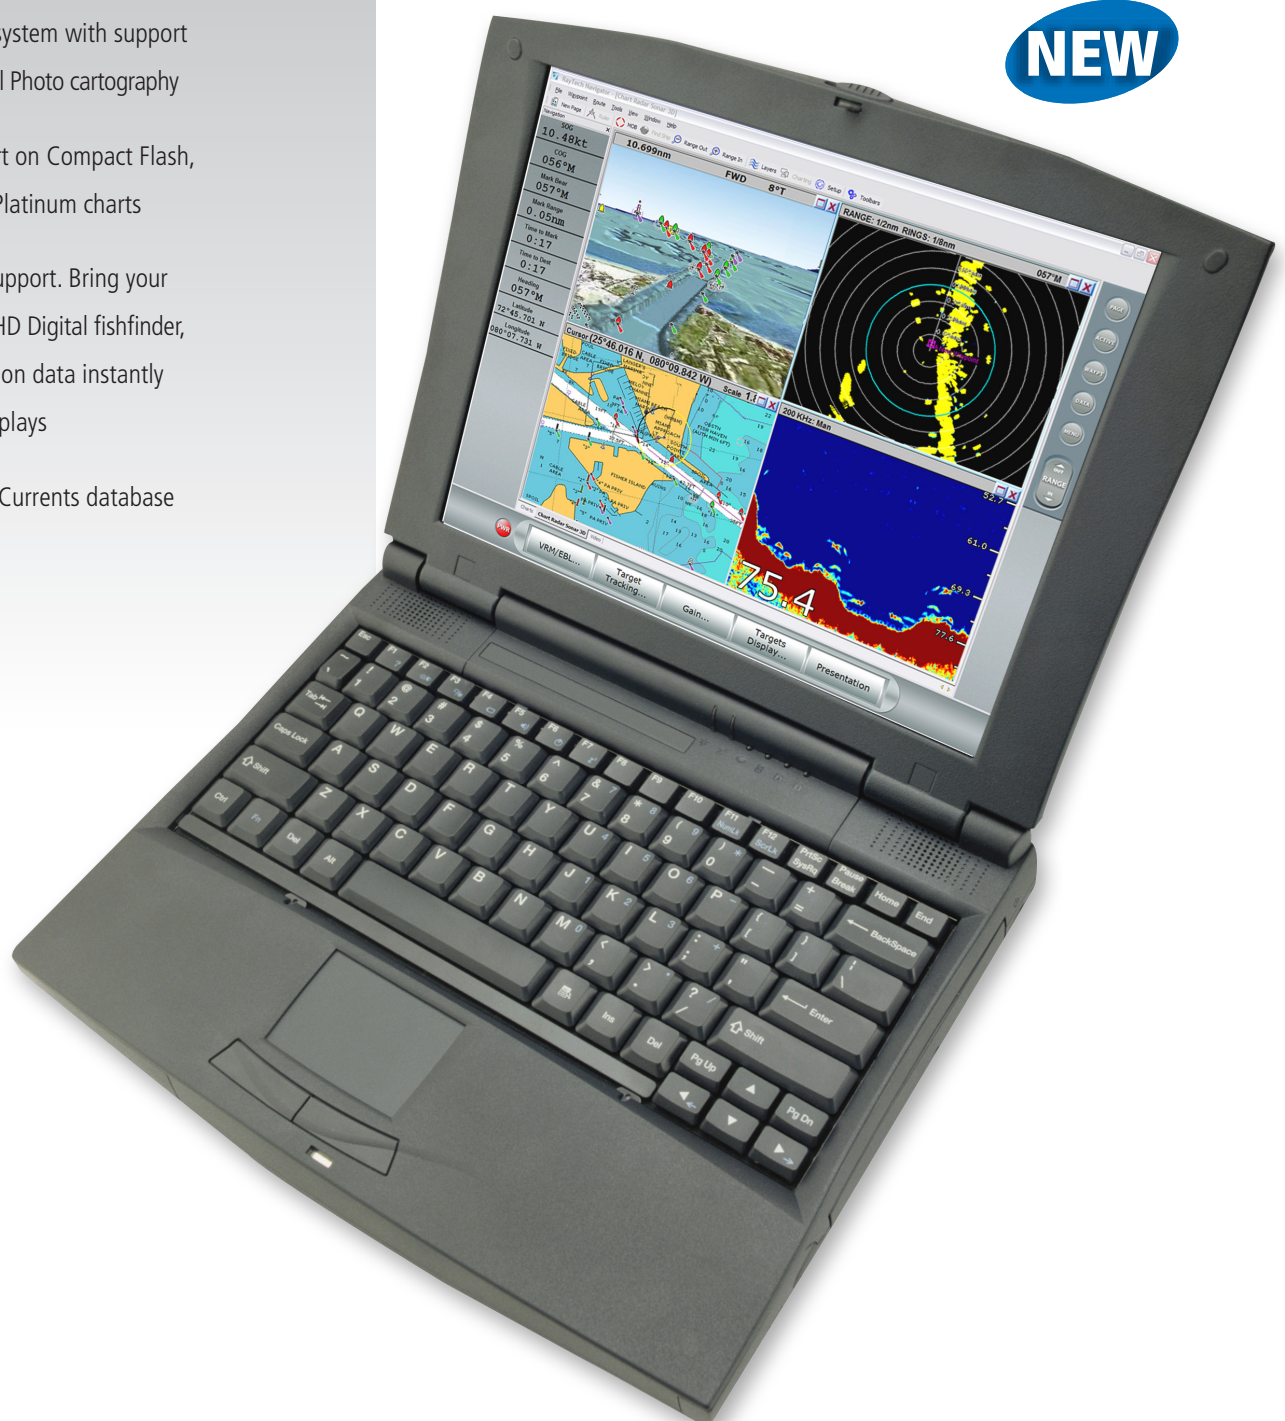

Powerful electronic charting system with support for Raster, Vector, 3D and Aerial Photo cartography

New Navionics® chart support on Compact Flash, including multi-dimensional Platinum charts

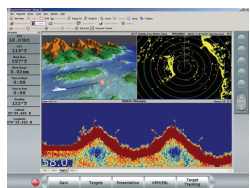

New SeaTalk^{hs} Networking support. Bring your PC onboard and share radar, HD Digital fishfinder, Navionics charts and navigation data instantly with Raymarine's E-Series displays

Built in Worldwide Tides and Currents database

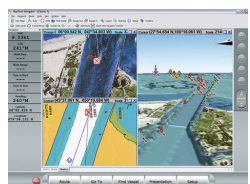

NEW

Navigate in 3D with Navionics Platinum Charts

Network with Raymarine radars and HD Digital™ fishfinders

Overlay aerial photos on top of vector or raster charts

NEW RayTechRNS 6. Software

New In 6.0

- A simple, Ethernet connection between the PC and Raymarine's SeaTalk^{hs} network allows the captain to access and share radar, HD Digital™ fishfinder, charts and navigation data instantly with Raymarine's E-Series displays
- Supplied with a Navionics USB Multicard reader for viewing Navionics charts on Compact Flash
- Improved waypoint and route sharing tools. Now it's even easier to plan routes and waypoints at home and share them with your Raymarine chartplotter on board
- New HD Digital fishfinding playback feature allows you to "rewind" the fishfinder display
- DSC Position display
- Video camera support

Key Features

- Customizable user interface
- Animated weather forecasts overlay
- Sea surface temperature and plankton data overlays (subscription required)
- Navigation and tactical sailing tools
- DataTrak time-based graphs
- Polar data collection and analysis
- Route optimization
